

# How to point my GoDaddy Domain Name to RealOMS:

1. Login to your GoDaddy account. Click on DNS.

2. Click 'Edit'. The A (Host) both an \* and @ should point to 204.232.135.74 and the WWW CName (Alias) entry should be deleted. Save your changes.

3. Login to backroom of realOMS.

4. Under 'Website' 'Website Settings'. Enter your domain in the URL field (i.e. rewsllc.com). Save  
\*If you have additional URLs those can be entered in the 'additional website URLs' area.
