

Website Photo Headers:

Photo file Prerequisites:

- Each template will provide a required minimum image size.
1. Login to backroom through the realOMS login.
 2. Click on 'Website' then 'Website Settings'. In the Website Template area click on 'Headers'

3. Headers can be chosen from the default options listed. For further customization upload photos that correspond to your specific market.
 - If no photos are check marked all photos will rotate on website.
 - If only one photo is check marked that will be the only photo shown on webpage.
 - When several photos are check marked, those photos will rotate in the header of the webpage.

Shared Headers for this template HIDE

If you select no photos then the default standard photo library will be used as the default selection.

<input type="checkbox"/> 	<input type="checkbox"/> 	<input type="checkbox"/> 
<input type="checkbox"/> 	<input type="checkbox"/> 	<input type="checkbox"/> 
<input type="checkbox"/> 	<input type="checkbox"/> 	<input type="checkbox"/> 

4. Scroll to the bottom of the page to upload photos.
- Click 'Upload Images' and choose the file you would like to upload
 - After you have chosen your images. Save.

Upload Image header(s) HIDE

Upload Headers: (headers should be at least 900px by 600px)

Upload Image header(s) HIDE

Upload Headers: (headers should be at least 900px by 600px)

Image(s)

5. Crop and Resize. Click Finish.

Crop and Size your header

Here you can drag, and size your header, the lit region represents the final header that will be displayed, you can drag it to move it, and drag the white 're-size handles' to change the size, however the shape will remain the same as the header on the website. When you satisfied with your selection click the button below the image, if you have decided you wish to not upload this as a new header, you may select cancel to the left of the Next/Finish Button below the image.

6. The image will now be in the 'My Headers for this Template' area. To make this image active on your webpage check the box to the left of the image. Save, and the image is now active on your webpage.
